# AGRICULTURE & HEALTH SUMMIT

Microbiome science has provided a new dimension to our knowledge of mechanisms by which food supports health, and many scientists are zeroing in on interactions between **gut microbes** and diet in their efforts to curb the development and progression of chronic disease. Given the increasing mechanistic links between gut microbes and diet, the time is right for microbiome science to move into the mainstream — **toward practical applications in the global food production system.**

The Nebraska Food for Health Center (NFHC) has its roots in the long tradition of agricultural and food science innovation by researchers at the University of Nebraska. As the hub for a **growing international community of individuals leveraging microbiome science for better human health via innovations in food and agriculture**, NFHC is pleased to host its inaugural international event – *Agriculture & Health Summit: Cultivating Gut Health at the Crossroads of Food & Medicine.*

Seminars, panel discussions and posters will focus on these topics:

- Food for health and why it matters
- Diet-microbiome interactions for disease prevention and treatment
- Discovery of microbiome-related biomarkers for improving human health
- Dietary components and modulation of the gut microbiome
- Understanding the Opportunities and Barriers to Product Commercialization
- Substantiation, standardization, and regulatory issues in food for health
- Strategies for improving crops with the objective of supporting human health

## CONFERENCE FEATURES

Live speaker  
Q&As

Interactive  
virtual exhibition  
area

One-on-one  
participant  
networking

Recordings  
available  
after event

**Yolanda Sanz**  
Spanish National  
Research Council

**Bruce German**  
Director, Foods for Health  
Institute, UC Davis

**Jens Walter**  
APC Microbiome  
Ireland

**Patrick Veiga**  
Director, Health and  
Microbiome Science,  
Danone Nutricia Research

**Nathalie Delzenne**  
President, Louvain Drug  
Research Institute

**Susan Mitmesser**  
Vice President, Science &  
Technology, Pharmavite

**Paul Ross**  
Director, Alimentary  
Pharmabiotic Center

**Bruce Hamaker**  
Director, Whistler  
Carbohydrate Center,  
Purdue University

**Bob Hutkins**  
University of  
Nebraska-Lincoln
